MEET THUMMAR

Technical Lead | Senior Software Engineer — Java, Spring Boot, Angular

Ahmedabad, India | thummarmeet01@gmail.com | https://www.linkedin.com/in/thummarmeet | https://github.com/meetbyte | https://meetbyte.github.io

PROFESSIONAL SUMMARY

Technical Lead and Senior Software Engineer with 7+ years of experience delivering enterprise banking, financial services, insurance, telecom and education applications for clients in India, Malaysia, the UAE, Canada and East Asia. Lead teams of 2–8 developers and own delivery end to end, from requirements and HLD/LLD through implementation, integration, release and production support, while staying hands-on in Java, Spring Boot, Angular and Oracle. Known for modernizing legacy platforms, building secure self-service systems, and bringing AI-assisted and automated quality checks into everyday delivery. Open to India and international opportunities.

KEY ACHIEVEMENTS

- **~40–50 hours/month saved for 250–270 business users:** designed and built an Oracle APEX self-service data platform from scratch for a banking client, replacing a business → project team → DBA request chain with a governed workflow for customer segmentation, extraction and weekly/monthly scheduled delivery, secured with LDAP login, role-based access, PII masking and audit logging.
- **32–35 modules migrated across 3 complete applications:** moved applications between IBM MobileFirst versions (7.x to 8.x) and from MobileFirst 8.x to Java/Spring Boot, replacing discontinued platform APIs while preserving existing functionality, including loan, EMI and payment journeys, and team coding standards.
- **Led teams of 2–8 developers** across projects, owning requirements, HLD/LLD, task planning, release and production support; set up end-to-end Jenkins pipelines for frontend and backend deployment and added SonarQube code-quality checks.
- **Engineering productivity:** built a standards-bound GitHub Copilot agent for documentation, comments and code maintenance, and added OWASP dependency checks and code scanning to GitHub workflows.
- **Breadth across 5 industries and 5 markets:** delivered insurance, banking, financial services, telecom and education applications for clients in India, Malaysia, UAE, Canada and East Asia, from greenfield builds to platform migrations and production support.

TECHNICAL SKILLS

Backend & APIs: Java (SE/EE), Spring Boot, Spring MVC, Servlets, JSP, JSF, JPA, JDBC, REST APIs, APIGEE, Maven, Schedulers

Frontend & Hybrid: Angular (incl. Angular 8), TypeScript, JavaScript, HTML5, CSS3, Bootstrap, AJAX, Ionic, Cordova, PhoneGap, jQuery Mobile

Enterprise Platforms: Oracle APEX, IBM MobileFirst / Worklight 7.x & 8.x (server setup, adapters, migrations), WebSphere, Liberty, Apache Tomcat

Databases: Oracle Database, Microsoft SQL Server, MySQL, SQLite, SQL, dynamic query generation

Security & Integration: Microsoft LDAP, role-based access control, PII masking, audit logging, OTP, encryption/decryption, third-party and bureau integrations

CI/CD & Code Quality: Jenkins, Git, Bitbucket, GitHub Actions, SonarQube, OWASP Dependency-Check, code scanning, Jira

Design & Delivery: System design, HLD/LLD, system flow design, draw.io, Agile, estimation, root cause analysis (RCA), production support, technical documentation

AI-Assisted Engineering: Custom GitHub Copilot agent (standards-bound) for documentation, comments and code maintenance

Cloud: AWS Certified Cloud Practitioner (foundational cloud knowledge)

Currently Exploring: Python and applied AI (LLMs, prompting, AI APIs), Next.js, Node.js, large-scale system design

PROFESSIONAL EXPERIENCE

Senior Technical Consultant (Technical Lead) | Jan 2024 – Present

Streebo | Client engagement: global financial services organization | Ahmedabad, India (Hybrid)

- Lead teams of 2–8 developers depending on project scope and own end-to-end delivery: turn business requirements into system flows and HLD/LLD, plan and distribute tasks, resolve integration dependencies and carry work through QA to release.
- **Architected and built an Oracle APEX self-service data platform from scratch** for a banking business in an East Asian market, replacing a business → project team → DBA request chain with a governed workflow for customer

segmentation (card, spending, market criteria), extraction and scheduled delivery. **Saves ~40–50 hours/month for 250–270 business users.**

- Secured the platform with Microsoft LDAP login, User/Supervisor/Admin role-based permissions, database security, PII masking and audit logging; added weekly/monthly scheduled file generation, exports and email notifications; handled server installation and custom HTML/CSS integration.
- Build role-based portals and enterprise workflows with Oracle APEX, Angular and Spring Boot, integrating internal APIs, directory services and third-party tools.
- Deliver credit-card application and statement enhancements across multiple regions (Oracle Database, SQL, WebSphere, Liberty, Cordova).
- Own production issue resolution: investigate root causes with business, customer support, QA and production support teams and take each issue from report through implemented, verified fix.
- **Introduced AI-assisted and automated engineering checks:** created a standards-bound GitHub Copilot agent for documentation, comments and code updates; added OWASP dependency checks and code scanning through GitHub workflows; added SonarQube code-quality checks and end-to-end Jenkins deployment.

Technical Consultant | Jan 2021 – Dec 2023

Streebo | Banking, insurance, education and financial services clients | Ahmedabad, India (Hybrid)

- **India banking application (loans, EMI, payment status):** migrated the backend from IBM MobileFirst 8.x to Java Spring Boot, converting SQL, HTTP and Java adapters to Spring Boot API calls, replacing discontinued platform APIs and integrating APIGEE and Cordova plugins. Set up Jenkins pipelines for automated frontend and backend deployment.
- **Leading Malaysian insurer:** built a hybrid customer and agent application from scratch (Angular, Java services, MobileFirst 8): new-policy purchase, endorsements, role-based dashboards for multiple agent roles and offline journeys with local store.
- **Leading Indian insurer (Android/iOS):** delivered policy services, multiple payment methods and document uploads; built OTP generation and management; integrated SMS, email and WhatsApp messaging, Aadhaar-based data services and encryption/decryption; supported offline journeys and cross-browser behavior.
- **UAE education society (students and authority app):** migrated the hybrid app from MobileFirst 7.x to 8.x, covering front-end components, SQL/HTTP/Java adapters, Google API changes and Cordova plugins for discontinued APIs.
- Delivered hybrid financial features with Angular, Java and MobileFirst, including account statements, fund transfers, payee management and location-based services.
- Worked with QA and production support on releases across WebSphere and Liberty environments.

Associate Technical Consultant | Jul 2019 – Dec 2020

Streebo | Telecommunications and financial services clients | Ahmedabad, India (On-site)

- **Leading Malaysian telecom provider:** independently led Angular 8 and Ionic UI development on MobileFirst 8 for customer and multi-level agent journeys; implemented a KYC-based journey, OCR document verification and device regulation handling.
- **Leading Canadian multinational financial organization (cards app):** contributed to the MobileFirst 7.x to 8.x migration, updating front-end components and server-side adapters and replacing discontinued APIs with Cordova plugins.
- Participated in planning, estimation, testing and client query resolution (REST APIs, SQL, PhoneGap, jQuery Mobile).

Internship Trainee | Jan 2019 – Jul 2019

Streebo | Ahmedabad, India

- Developed Angular/JavaScript UI components, Java backend modules and MySQL integrations for insurance applications; took part in sprint discussions, code reviews and estimation.

Internship Trainee | Oct 2017 – May 2018

Silverwing Technologies Pvt. Ltd. | Ahmedabad, India

- Built responsive e-commerce components with HTML, CSS, JavaScript, Bootstrap, AJAX and PHP, with SQL database work.

EDUCATION

Bachelor of Engineering, Information Technology — L.D. College of Engineering, Ahmedabad | 2015 – 2019 | CGPA: 8.2/10

CERTIFICATION

AWS Certified Cloud Practitioner — Amazon Web Services | Issued Apr 2025, expires Apr 2028
